SUMMARY

Full-stack qualified with a passion for software and application design, ready to build systems for a great user experience and practicality. Recently earned a certificate in full stack development from the University of Western Australia through their Coding Bootcamp, with newly developed skills in Html, native css and bootstrap framework, vanilla javascript with a good understanding of jquery and node.js. With strong problem solving skills I can optimize design and implantation of user-face products. With each project, my aim is to best engage my audience while also working closely with my team to create productive and user-friendly experience. I applied aspects of my skill set in my recent project that used two api's which collected data on video game deals.

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript

Applications: insomnia, git, vs studio, mysql, Heroku

Tools: Node.js, bootstrap, express, sequelize, nodemon, enquirer.

PROJECTS

Game-Deal-Compare | <https://github.com/SiddySixsmith/Game-Deal-Compare> | <https://siddysixsmith.github.io/Game-Deal-Compare>

- This application uses to api's fetching data about video games and they're pricing. Using a css framework and javascript we were able to use all received data and show it on the page.
- My core reasonability's were management of git hub repo and the writing of the large part of the javascript.
- Languages used was mainly javascript and tool used were vs code, font awesome and google fonts

README-Builder | <https://github.com/SiddySixsmith/README-Builder> |

- This project allows a user to input info about there current project. the program then takes the users input and creates a professional readme
- To build this application from scratch
- Languages used was mainly javascript and tool used were vs code. Packages included in this application were inquirer and markdown-utils

Online-Material-Store | <https://github.com/Sandoman19/Online-Material-Store> |
Coming Soon

- My Second major project is currently still in the works but this application is used to access a database of materials. Clients login and choose required product then once item is in cart a invoice is sent to them with attached items
- To build routes , start the server and create a sequelize connect to the database

- Languages used was mainly javascript and tool used were vs code. Packages included in this application were bcript, connect_session-sequelize, dotenv, express, express-handbars, msq2, sequielize and express-session

EXPERIENCE

Concrete and Stone finisher Shinelt Systems

2017 – 2021

Perth, WA

In this role I was managing a small team of 2. I had to use my communication skills between my team and our clients. Time management and equipment was also a day to day task for me, making sure that my team and other teams were prepared for the week.

Volunteer Hills Raiders Basketball Association

2014 – 2021

Perth, WA

During my time at Hills Raiders I Had many titles. Ranging from setup and pack staff to IT officer and finishing my time there as there Executive committee member/Property Officer/IT Officer.

Key accomplishments;

- In 2 years I made it to a committee member
- 2 and half years executive member
- In my final year I managed 2 separate departments while holding an Executive member position
